

Alyson Hamilton-Lacey

“A distinguished track record of building strong businesses and services”

Alyson became shareholder and owner of ITEX (Isle of Man) Limited with husband James after completing a management buyout from C5 Alliance in 2013, and continues in her role as Managing Director, a position she has held since 2008, primarily focusing on the day to day operations and driving sales growth.

She has a distinguished track record of building strong businesses and services, having previously been Commercial Director for Manx Telecom, and Managing Director of XKO (IOM) Ltd that became 2e2. Her early career was with Fujitsu (ICL) after graduating with Honours from Warwick University.

ITEX specialises in Enterprise Technology solutions and Cloud services. During its history of developing the Isle of Man's first Cloud Service “My Office Online”, they have been awarded

Microsoft's Cloud Accelerate accreditation and HP's Cloud Centre of Business Excellence (CCOE) award, one of five in the UK and twenty-one across Europe at that time.

As part of a natural technological and business evolution, ITEX are launching RED5 Technologies later this year. RED5 is a brand with its own business orientated focus and identity, dedicated to cloud based technology solutions and their associated managed services for the SMB market.

Alyson lives in Port St Mary, Isle of Man with her husband James and children Luke and Abi. When she needs a break from liaising with clients and suppliers or staying on top of a project, she can often be found on walks or on the beach enjoying time with the family.

Connect with Alyson directly at LinkedIn via [Linked.in/AHLITEX](https://www.linkedin.com/company/ahlitex) or for more information visit www.itex.im
